### **DETAILED ACTION**

Receipt is acknowledged of applicant's response to the restriction requirement (filed on 4 June 2007) and IDS (filed on 3 September 2004).

### ***Election/Restrictions***

Applicant's election with traverse of Group I in the reply filed on 4 June 2007 is acknowledged. The traversal is on the ground that an examination of all the claims does not impose a serious search burden. This is not found persuasive because elements exist in each of the groups which require searches in areas not required for the other groups.

The requirement is still deemed proper and is therefore made FINAL.

Claims 5-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4 June 2007.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1615

Claims 1-4 and 23 rejected under 35 U.S.C. 102(b) as being anticipated by FR 2,734,574 ("Weon").

Weon discloses a multilayer film composition (see page 1, lines 2-11; figures 1 and 2) comprising:

- the neutral water soluble polymer of instant claim 1 and polyvinylpyrrolidone of instant claim 2 (see page 8, line 32);
- the polyvalent cationic ion source of instant claim 1 and aluminum salts of instant claim 3 (see page 7, lines 32-33); and
- the anionic water soluble polymer of instant claim 1 and sodium alginate of instant claim 4 (see page 9, line 2).

No patentable weight is given to the future intended use of instant claim 23.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1615

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 and 23 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-23 of copending Application No. 11/031,023 ('023). Although the conflicting claims are not identical, they are not patentably distinct from each other because '023 claims a multilayer film composition comprising a first water soluble layer further comprising a neutral water soluble polymer and a polyvalent cationic source and a second water soluble layer comprising an anionic water soluble polymer (claim 1).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
